

# KixCare TIPS

## When Will My Baby Start Walking?

Babies begin walking when they are developmentally ready and strong enough.

- 1 Usually, between 8-9 months babies start pulling themselves up using furniture and toys. They slowly start gaining strength and confidence to take a hand-off, then both hands, and eventually try to move backward or forward.
- 2 Between 9-12 months many babies have started taking their 1st few steps. If this is not your baby, don't panic.
- 3 Between 12-24 months babies will start walking and before you know it running.
